REQUEST FOR EXTENSION OF 45-DAY REPORTING REQUIREMENTS, UNITED STATES DEPARTMENT OF ENERGY (DOE), ROCKY FLATS ENVIRONMENTAL TECHNOLOGY SITE (SITE), GOLDEN, COLORADO - TGH-444-94

EG&G Rocky Flats, Inc. (EG&G) is requesting an extension for the 45-day reporting requirement for the preparation of an Initial Site Characterization Report associated with the Notification of Release, dated September 30, 1994, from an underground storage tank (UST) at the above referenced site. EG&G has completed the site assessment and closure of a UST used to store diesel fuel for Building 776 at the Site. This extension of the November 14, 1994 due date is required due to delays caused by unexpected difficulties encountered during data compilation and report preparation and review. EG&G is preparing and will submit a report by November 30, 1994, which details the findings of the site assessment and documents the closure in accordance with the Colorado Department of Public Health and the Environment (CDPH&E) UST Rules and Regulations (6 CCR), Subpart F, Sections 280.72 and 280.63. Copies of the report will be forwarded to CDPH&E and the Department of Labor, Oil Inspection Section.

Thank you for your understanding in this matter. If you have any questions or require additional information, please contact Mike Ferrari at 966-5831.

T. G. Hedahl
T. G. Hedahl, Director
Waste Management
